

# Contents

<b>About</b>	1
<b>Chapter 1: Getting started with algorithms</b>	2
Section 1.1: A sample algorithmic problem	2
Section 1.2: Getting Started with Simple Fizz Buzz Algorithm in Swift	2
<b>Chapter 2: Algorithm Complexity</b>	5
Section 2.1: Big-Theta notation	5
Section 2.2: Comparison of the asymptotic notations	6
Section 2.3: Big-Omega Notation	6
<b>Chapter 3: Big-O Notation</b>	8
Section 3.1: A Simple Loop	9
Section 3.2: A Nested Loop	9
Section 3.3: $O(\log n)$ types of Algorithms	10
Section 3.4: An $O(\log n)$ example	12
<b>Chapter 4: Trees</b>	14
Section 4.1: Typical anyary tree representation	14
Section 4.2: Introduction	14
Section 4.3: To check if two Binary trees are same or not	15
<b>Chapter 5: Binary Search Trees</b>	18
Section 5.1: Binary Search Tree - Insertion (Python)	18
Section 5.2: Binary Search Tree - Deletion(C++)	20
Section 5.3: Lowest common ancestor in a BST	21
Section 5.4: Binary Search Tree - Python	22
<b>Chapter 6: Check if a tree is BST or not</b>	24
Section 6.1: Algorithm to check if a given binary tree is BST	24
Section 6.2: If a given input tree follows Binary search tree property or not	25
<b>Chapter 7: Binary Tree traversals</b>	26
Section 7.1: Level Order traversal - Implementation	26
Section 7.2: Pre-order, Inorder and Post Order traversal of a Binary Tree	27
<b>Chapter 8: Lowest common ancestor of a Binary Tree</b>	29
Section 8.1: Finding lowest common ancestor	29
<b>Chapter 9: Graph</b>	30
Section 9.1: Storing Graphs (Adjacency Matrix)	30
Section 9.2: Introduction To Graph Theory	33
Section 9.3: Storing Graphs (Adjacency List)	37
Section 9.4: Topological Sort	39
Section 9.5: Detecting a cycle in a directed graph using Depth First Traversal	40
Section 9.6: Thorup's algorithm	41
<b>Chapter 10: Graph Traversals</b>	43
Section 10.1: Depth First Search traversal function	43
<b>Chapter 11: Dijkstra's Algorithm</b>	44
Section 11.1: Dijkstra's Shortest Path Algorithm	44
<b>Chapter 12: A* Pathfinding</b>	49
Section 12.1: Introduction to A*	49
Section 12.2: A* Pathfinding through a maze with no obstacles	49
Section 12.3: Solving 8-puzzle problem using A* algorithm	56

<b>Chapter 13: A* Pathfinding Algorithm</b>	59
<a href="#">Section 13.1: Simple Example of A* Pathfinding: A maze with no obstacles</a>	59
<b>Chapter 14: Dynamic Programming</b>	66
<a href="#">Section 14.1: Edit Distance</a>	66
<a href="#">Section 14.2: Weighted Job Scheduling Algorithm</a>	66
<a href="#">Section 14.3: Longest Common Subsequence</a>	70
<a href="#">Section 14.4: Fibonacci Number</a>	71
<a href="#">Section 14.5: Longest Common Substring</a>	72
<b>Chapter 15: Applications of Dynamic Programming</b>	73
<a href="#">Section 15.1: Fibonacci Numbers</a>	73
<b>Chapter 16: Kruskal's Algorithm</b>	76
<a href="#">Section 16.1: Optimal, disjoint-set based implementation</a>	76
<a href="#">Section 16.2: Simple, more detailed implementation</a>	77
<a href="#">Section 16.3: Simple, disjoint-set based implementation</a>	77
<a href="#">Section 16.4: Simple, high level implementation</a>	77
<b>Chapter 17: Greedy Algorithms</b>	79
<a href="#">Section 17.1: Huffman Coding</a>	79
<a href="#">Section 17.2: Activity Selection Problem</a>	82
<a href="#">Section 17.3: Change-making problem</a>	84
<b>Chapter 18: Applications of Greedy technique</b>	86
<a href="#">Section 18.1: Offline Caching</a>	86
<a href="#">Section 18.2: Ticket automat</a>	94
<a href="#">Section 18.3: Interval Scheduling</a>	97
<a href="#">Section 18.4: Minimizing Lateness</a>	101
<b>Chapter 19: Prim's Algorithm</b>	105
<a href="#">Section 19.1: Introduction To Prim's Algorithm</a>	105
<b>Chapter 20: Bellman-Ford Algorithm</b>	113
<a href="#">Section 20.1: Single Source Shortest Path Algorithm (Given there is a negative cycle in a graph)</a>	113
<a href="#">Section 20.2: Detecting Negative Cycle in a Graph</a>	116
<a href="#">Section 20.3: Why do we need to relax all the edges at most (V-1) times</a>	118
<b>Chapter 21: Line Algorithm</b>	121
<a href="#">Section 21.1: Bresenham Line Drawing Algorithm</a>	121
<b>Chapter 22: Floyd-Warshall Algorithm</b>	124
<a href="#">Section 22.1: All Pair Shortest Path Algorithm</a>	124
<b>Chapter 23: Catalan Number Algorithm</b>	127
<a href="#">Section 23.1: Catalan Number Algorithm Basic Information</a>	127
<b>Chapter 24: Multithreaded Algorithms</b>	129
<a href="#">Section 24.1: Square matrix multiplication multithread</a>	129
<a href="#">Section 24.2: Multiplication matrix vector multithread</a>	129
<a href="#">Section 24.3: merge-sort multithread</a>	129
<b>Chapter 25: Knuth Morris Pratt (KMP) Algorithm</b>	131
<a href="#">Section 25.1: KMP-Example</a>	131
<b>Chapter 26: Edit Distance Dynamic Algorithm</b>	133
<a href="#">Section 26.1: Minimum Edits required to convert string 1 to string 2</a>	133
<b>Chapter 27: Online algorithms</b>	136
<a href="#">Section 27.1: Paging (Online Caching)</a>	137
<b>Chapter 28: Sorting</b>	143
<a href="#">Section 28.1: Stability in Sorting</a>	143

<b><a href="#">Chapter 29: Bubble Sort</a></b>	144
<a href="#">Section 29.1: Bubble Sort</a>	144
<a href="#">Section 29.2: Implementation in C &amp; C++</a>	144
<a href="#">Section 29.3: Implementation in C#</a>	145
<a href="#">Section 29.4: Python Implementation</a>	146
<a href="#">Section 29.5: Implementation in Java</a>	147
<a href="#">Section 29.6: Implementation in Javascript</a>	147
<b><a href="#">Chapter 30: Merge Sort</a></b>	149
<a href="#">Section 30.1: Merge Sort Basics</a>	149
<a href="#">Section 30.2: Merge Sort Implementation in Go</a>	150
<a href="#">Section 30.3: Merge Sort Implementation in C &amp; C#</a>	150
<a href="#">Section 30.4: Merge Sort Implementation in Java</a>	152
<a href="#">Section 30.5: Merge Sort Implementation in Python</a>	153
<a href="#">Section 30.6: Bottoms-up Java Implementation</a>	154
<b><a href="#">Chapter 31: Insertion Sort</a></b>	156
<a href="#">Section 31.1: Haskell Implementation</a>	156
<b><a href="#">Chapter 32: Bucket Sort</a></b>	157
<a href="#">Section 32.1: C# Implementation</a>	157
<b><a href="#">Chapter 33: Quicksort</a></b>	158
<a href="#">Section 33.1: Quicksort Basics</a>	158
<a href="#">Section 33.2: Quicksort in Python</a>	160
<a href="#">Section 33.3: Lomuto partition java implementation</a>	160
<b><a href="#">Chapter 34: Counting Sort</a></b>	162
<a href="#">Section 34.1: Counting Sort Basic Information</a>	162
<a href="#">Section 34.2: Psuedocode Implementation</a>	162
<b><a href="#">Chapter 35: Heap Sort</a></b>	164
<a href="#">Section 35.1: C# Implementation</a>	164
<a href="#">Section 35.2: Heap Sort Basic Information</a>	164
<b><a href="#">Chapter 36: Cycle Sort</a></b>	166
<a href="#">Section 36.1: Pseudocode Implementation</a>	166
<b><a href="#">Chapter 37: Odd-Even Sort</a></b>	167
<a href="#">Section 37.1: Odd-Even Sort Basic Information</a>	167
<b><a href="#">Chapter 38: Selection Sort</a></b>	170
<a href="#">Section 38.1: Elixir Implementation</a>	170
<a href="#">Section 38.2: Selection Sort Basic Information</a>	170
<a href="#">Section 38.3: Implementation of Selection sort in C#</a>	172
<b><a href="#">Chapter 39: Searching</a></b>	174
<a href="#">Section 39.1: Binary Search</a>	174
<a href="#">Section 39.2: Rabin Karp</a>	175
<a href="#">Section 39.3: Analysis of Linear search (Worst, Average and Best Cases)</a>	176
<a href="#">Section 39.4: Binary Search: On Sorted Numbers</a>	178
<a href="#">Section 39.5: Linear search</a>	178
<b><a href="#">Chapter 40: Substring Search</a></b>	180
<a href="#">Section 40.1: Introduction To Knuth-Morris-Pratt (KMP) Algorithm</a>	180
<a href="#">Section 40.2: Introduction to Rabin-Karp Algorithm</a>	183
<a href="#">Section 40.3: Python Implementation of KMP algorithm</a>	186
<a href="#">Section 40.4: KMP Algorithm in C</a>	187
<b><a href="#">Chapter 41: Breadth-First Search</a></b>	190

Section 41.1: Finding the Shortest Path from Source to other Nodes .....	190
Section 41.2: Finding Shortest Path from Source in a 2D graph .....	196
Section 41.3: Connected Components Of Undirected Graph Using BFS .....	197
<b>Chapter 42: Depth First Search</b> .....	202
Section 42.1: Introduction To Depth-First Search .....	202
<b>Chapter 43: Hash Functions</b> .....	207
Section 43.1: Hash codes for common types in C# .....	207
Section 43.2: Introduction to hash functions .....	208
<b>Chapter 44: Travelling Salesman</b> .....	210
Section 44.1: Brute Force Algorithm .....	210
Section 44.2: Dynamic Programming Algorithm .....	210
<b>Chapter 45: Knapsack Problem</b> .....	212
Section 45.1: Knapsack Problem Basics .....	212
Section 45.2: Solution Implemented in C# .....	212
<b>Chapter 46: Equation Solving</b> .....	214
Section 46.1: Linear Equation .....	214
Section 46.2: Non-Linear Equation .....	216
<b>Chapter 47: Longest Common Subsequence</b> .....	220
Section 47.1: Longest Common Subsequence Explanation .....	220
<b>Chapter 48: Longest Increasing Subsequence</b> .....	225
Section 48.1: Longest Increasing Subsequence Basic Information .....	225
<b>Chapter 49: Check two strings are anagrams</b> .....	228
Section 49.1: Sample input and output .....	228
Section 49.2: Generic Code for Anagrams .....	229
<b>Chapter 50: Pascal's Triangle</b> .....	231
Section 50.1: Pascal triangle in C .....	231
<b>Chapter 51: Algo:- Print a m*n matrix in square wise</b> .....	232
Section 51.1: Sample Example .....	232
Section 51.2: Write the generic code .....	232
<b>Chapter 52: Matrix Exponentiation</b> .....	233
Section 52.1: Matrix Exponentiation to Solve Example Problems .....	233
<b>Chapter 53: polynomial-time bounded algorithm for Minimum Vertex Cover</b> .....	237
Section 53.1: Algorithm Pseudo Code .....	237
<b>Chapter 54: Dynamic Time Warping</b> .....	238
Section 54.1: Introduction To Dynamic Time Warping .....	238
<b>Chapter 55: Fast Fourier Transform</b> .....	242
Section 55.1: Radix 2 FFT .....	242
Section 55.2: Radix 2 Inverse FFT .....	247
<b>Appendix A: Pseudocode</b> .....	249
Section A.1: Variable affectations .....	249
Section A.2: Functions .....	249
<b>Credits</b> .....	250
<b>You may also like</b> .....	252
